

FL 550

POUR POINT AND FLOW IMPROVER FOR DIESEL & HEATING OIL

DESCRIPTION

FL 550 is a mixture of special solvents and low molecular weight olefins, suitable for diesel and heating oil and also for medium oil fractions. **FL 550** acts effectively even at a very low temperatures as an antifreeze additive and flow improver.

APPLICATION & USE

By adding **FL 550** at a dosage of 1 liter of product per 1000 liters of oil, the cold filter plugging point (CFPP) can be reduced up to -15 °C and the pour point up to -29 °C. Also its combined action helps the improvement of fluidity of oil even at very low temperatures, below -20 °C. **FL 550** is added to the fuel tank before refueling at a dose of 1 liter **FL 550** per 1000 liters of oil.

PACKAGING

FL 550 is available in 25 ltr pails and 208 ltr drums.

- ✓ Reduction of cold filter plugging point (CFPP) up to -15 °C.
- ✓ Reduction of the pour point (PP) of the oil, up to -29 °C.
- ✓ Improves the fluidity of oils even at low temperatures
- ✓ Concentrated product, used in small doses.
