

### FUEL ADDITIVES

## FC 600D M

### COMBUSTION IMPROVER AND SOOT REDUCER FOR MARINE DIESEL

#### DESCRIPTION

**FC 600D M** an excellent combustion improver, for marine internal combustion engines that consume marine diesel and contains special combustion catalysts, surfactants and anti-corrosion compounds.

**FC 600D M** improves combustion, increases horsepower, reduces exhaust and soot, and overall keeps the engine cleaner.

#### APPLICATION

**FC 600D M** is used for improving combustion and efficiency of the engine, for reducing emissions, soot and unburned particles by 80%. Due to its catalytic action and the special cleaners in its composition, **FC 600D M** minimizes carbon deposits and keeps the combustion chamber cleaner as well as the injectors, valves and pistons, maximizing engine's performance.

#### USE AND DOSING

Depending on the condition of the engine and the quality of the fuel, the dosage of **FC 600D M** is 1 liter per 5000 - 7000 liters of diesel.

Add **FC 600D M** into the fuel line using a dosing pump. Alternatively **FC 600D M** can be added directly to the "daily" consumption tank.

#### PRODUCT PROPERTIES

General Instructions: Avoid spillage, splashing and mishandling. Precautionary measures for body protection are strongly recommended before and during use.

Appearance:	Liquid	pH (undiluted):	N/A
Type:	Organic based	Pour Point:	< -15°C

- ✓ Enhances engine efficiency
- ✓ Minimizes carbon deposits
- ✓ Reduces exhaust and emissions
- ✓ Improves combustion
- ✓ Concentrated product
- ✓ Minimize maintenance cost

#### PROBLEMS SOLVED

- ✓ Engine efficiency
- ✓ Combustion
- ✓ Emissions

#### APPLICATION AREAS

- ✓ Engine

PRODUCT CODE: FT 262
